

# Welcome To AyroUI Documentation

Firstly, a huge thanks for purchasing this UI kit, your support is truly appreciated!

This document covers the basic structure of AyroUI and often reveals answers to common questions. If you have any questions that are beyond the scope of this document, feel free to [Open a Support Ticket](#)

## File and Folder Structure

- **Root directory with all HTML files.**
- **Assets**
  - **CSS:** CSS files, style.css is main CSS file here also there are some library related CSS files.
  - **Fonts:** Font files that used on UI kit, mainly Lincelcons.
  - **Images:** All Images that used to demonstrate the UI kit sections and elements. Nested and structured depending on sections and elements.
  - **JS:** All javascript and jQuery plugins including main.js which is setting file of used libraries.
  - **SCSS:** Individual SASS files for each sections and elements.

## Understanding Codebase

All HTML, CSS, SASS and JS codes are well-documented, you will understand at a glance. For example this is code sample of single team element:

```
<!--===== TEAM STYLE FOUR START =====>
<section class="team-area mb-70">
  <div class="container">
    <div class="row">
      <div class="col-lg-4 col-md-6">
        <div class="single-team mt-30 team-style-four">
          <img class="team-image">
            
          <div class="team-content">
            <h4 class="name"><a href="#">Jeffery Riley</a></h4>
            <span class="sub-title">Art Director</span>
            <ul class="social">
              <li><a href="#"><i class="lni-facebook-filled"></i></a></li>
              <li><a href="#"><i class="lni-twitter-original"></i></a></li>
              <li><a href="#"><i class="lni-linkedin-original"></i></a></li>
              <li><a href="#"><i class="lni-instagram-original"></i></a></li>
            </ul>
          </div>
        </div> <!-- single team -->
      </div>
    </div>
  </div>
</section>
```

## Important Files:

- **scss/variables.scss:** All variables that used in template from font-family to colors, each and every repeated property covered by variable.scss
- **scss/style.scss:** All individual style files imported to this file and compiled into style.css which is being used as main stylesheet of UI kit.
- **scss/common.scss:** All global and common styles are declared here such as body properties, anchor tag etc.
- **css/default.css:** Contains all helper classes for margin, padding and backgrounds.
- **js/main.js:** Contains settings and triggers of used javascript and jQuery libraries.

- **css/style.css**: Compiled stylesheet of all individual SASS files, you have to edit this file to make style related changes, if you don't want to edit SASS files.
